Commentary

Overall financial markets continue to be adversely impacted by the confluence of record high commodity prices and the continuing credit related problems originating from the US sub prime lending market. These conditions have caused economic growth to slow considerably in both Canada and the United States while at the same time high commodity prices are beginning to lead to a marked increase in inflationary pressures. The month of August was better for investors with slightly positive monthly returns for both the TSX and the S&P 500, though year-to-date both indices have negative returns. It is difficult to know when these conditions will ease, however the financial markets tend to act as a leading indicator and have in the past anticipated economic recoveries, sometimes 6 to 12 months in advance of the actual pick up in economic activity. Based on market recoveries over the past 25 years, the financial services sector has quite often been among the strongest leading sectors.

Toronto Dominion Bank (TMX: TD) increased their quarterly dividend to \$0.61 per share, a 3% increase (Aug/08).

The Dividend 15 Split portfolio has a current dividend yield of approximately 3.8%.
